

**ES150 - series**  
**150 watts DC POWER SUPPLIES**

<b>ES 015-10</b>	<b>0 - 15 V</b>	<b>0 - 10 A</b>
<b>ES 030-5</b>	<b>0 - 30 V</b>	<b>0 - 5 A</b>
<b>ES 075-2</b>	<b>0 - 75 V</b>	<b>0 - 2 A</b>
<b>ES 0300-0.45</b>	<b>0 - 300 V</b>	<b>0 - 450 mA</b>

- 4 mm Safety Sockets
- Weight only 1.7 kg
- Wide input voltage range:  
90 - 265 VAC, 48 - 62 Hz
- Active Power Factor Correction
- Efficiency up to 84 %
- 0 - 5 V analog programmable  
(on both voltage and current)
- Isolated analog programming with optional external ISO AMP MODULE to prevent earth loops
- Programming Inputs and Monitoring Outputs have a very low offset
- **Ethernet** or **RS232** programming with optional internal cards
- **IEEE488** programming with optional external interface PSC 488 EXT
- Very low output ripple
- Stable output voltage or current
- Input / output insulation 3750 V rms
- EMC: high immunity and low emission
- Designed for long life at full power
- Protected against all overload and short circuit conditions
- Voltage and current control with 10 turn potentiometers, resolution 0.03 %
- Optional rear panel output connection (option includes remote sensing)
- 48 hours burn-in

<b>Input Connector</b>	Euro-connector at rear panel 10 Amp / 65 °C IEC320/C14, EN60320/C14
<b>Output Terminals</b>	Standard: 4 mm safety sockets at front-panel  Option: screw terminals (0.2-4 mm <sup>2</sup> ) at rear-panel (sockets at front removed) only combined with remote sensing, see remote sensing for option numbers (P119 - 122)
<b>Programming connector</b>	15 pole D-connector at rear panel (FEMALE)
<b>Cooling</b>	Convection cooling
<b>Enclosure</b> degree of protection	IP20
<b>Dimensions</b> (h x w x d)	52 x 222 x 202 mm
<b>Weight</b>	1.7 kg

CV = Constant Voltage  
CC = Constant Current

OVL = Over Voltage Limit

Specifications measured at  $t_{amb} = 25 \pm 5 \text{ }^\circ\text{C}$  and  $V_{in} = 230 \text{ VAC}$ , 50 Hz unless otherwise noted.

connections programming connector

dimensions

**Screwdriver adjustment****OPTION P001**

- For a **fixed setting** of the output values, avoids accidental adjusting of the CV and CC settings.
- The potmeters are moved backwards just behind the frontpanel and plastic caps are inserted to cover the holes, see picture.

**Master / slave operation**

- Parallel and Series operation with equal Current and Voltage sharing.
- This way two or more ES-units can be used together as one high power unit.
- Voltage and current of the units is controlled by the master (by potentiometers or by programming).
- For Parallel operation use 15 pole shielded cables, no special option required.
- For Series operation use the **Master / Slave Series Adapter** together with 15 pole shielded cables (1:1).

**Increased max. output voltage/current****OPTION P069**

- The maximum output voltage or current can be increased by approximately 10%. Normally this results in a derating of the maximum ambient temperature or other parameters.
- Always add increased value for voltage or current in ordercode, for example **ES030-5 P069 output 32V**.

*For exact details consult the technical department, email 'Support@Delta-Elektronika.nl'.*

**Enforced secondary isolation 1000 V****OPTION P089**

- The secondary isolation between output and ground is increased from standard 600 V to 1000 V.

**Remote sensing / Rear power outlet****OPTION P119-122**

- The voltage across the load is constant regardless of the output current.
- Rear connections for power leads.
- Maximum 2 V per load lead can be compensated.
- The sense leads are protected against accidental interruption.

**External ISO AMP for isolated analog programming ISO AMP Module**

- Provides galvanic isolation when programming and monitoring.
- Prevents problems with earth loops and common mode voltages.
- Pin compatible with the programming connector on the rear side.
- Bench operation and rail mounting.

**Internal Ethernet Power Supply Controller****OPTION P150**

- Internal Ethernet compatible interface to program a unit by a computer.
  - Combination possible with P119 - P122 (rear output terminals).
- Note: built inside the ES150, the digital user in- and outputs of the PSC-ETH are not available. Use the external module PSC-ETH EXT instead.*

**Internal RS232 Power Supply Controller****OPTION P148**

- Internal RS232 compatible interface to program a unit by a computer.
- Combination possible with P119 - P122 (rear output terminals).

**External IEEE488 Power Supply Controller****PSC 488 EXT**

- External IEEE488 compatible interface to program a unit by a computer.
- Pin compatible with the programming connector on the rear side.
- Bench operation and rail mounting.

*Note: it is not possible to have a combination of multiple internal and/or external interfaces.*

**19" rack mounting**

**Rear Connections**

**Standard unit:**  
Analog programming

**Option P150:**  
Ethernet programming

**Option P148:**  
RS232 programming

**Option P119 - 122:**  
Rear power outlet / rem. sensing
